Forest Landscape Ecology

Ajith H. Perera, Lisa Buse, Thomas Crow

Forest Landscape Ecology Ajith H. Perera, Lisa Buse, Thomas Crow

The discipline of landscape ecology has matured rapidly over the past few decades, generating a wealth of knowledge that can be used to enhance forest policy development and management. However, much of this knowledge has yet to be applied in practice.

'Forest Landscape Ecology: Transferring Knowledge to Practice' is the first book to introduce landscape ecologists to the discipline of knowledge transfer. The book considers knowledge transfer in general, critically examines aspects of transfer that are unique to forest landscape ecology, and reviews several case studies of successful applications for policy developers and forest managers in North America. Readers are encouraged to recognize the value of sharing their knowledge, and to understand their role in active knowledge transfer. The intent is to connect, as seamlessly and effectively as possible, ecological principles to policy and practice.

This book is written for researchers, academics and students in landscape ecology and related fields, as well as policymakers and land and resource managers who are interested in landscape-level approaches.
