Almanac of Business & Industrial Financial Ratios (2013) (Almanac of Business & Industrial Financial Ratios (W/CD)) Ph.D. Leo Troy

CCH's Almanac of Business and Industrial Financial Ratios is the first step in helping to determine a company's true measure of performance and value. The comprehensive resource puts 50 comparative performance indicators at the practitioner's command and covers all of North America (U.S., Canada, and Mexico) using NAICS data. The Almanac provides financial information that is calculated and derived from the latest available IRS data on nearly 5 million U.S. and international companies. The Almanac gives you accurate performance data for 50 operating and financial factors in 199 industries. Data for each industry is divided into 13 categories based on company size, so you'll find a precise benchmark against which to measure any company's performance. One quick glance at the appropriate field of business and company-size category and you've found the definitive starting point for competitive performance analysis. The Almanac provides competitive norms in actual dollar amounts for revenue and capital factors, such as net receivables, net property, inventories, total assets, portfolio income, and more. It then gives you important average operating costs in percent of net sales, including cost of operations, pensions and benefits, interest, and more. The Almanac provides ratios for industry-wide results for inventory turnover, current assets to working capital, quick ratio, asset turnover, and others. It also provides other critical financial factors in percentages, including debt ratio, return on assets, and return on equity, and profit margin. The Almanac of Business and Industrial Financial Ratios comes complete with a CD that contains a special Excel Spreadsheet Template that can be used to input data on a given company to see how a company compares with the data provided in the Almanac.
