Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition)

Craig Friedman, Sven Sandow

Utility-Based Learning from Data provides a pedagogical, self-contained discussion of probability estimation methods via a coherent approach from the viewpoint of a decision maker who acts in an uncertain environment. This approach is motivated by the idea that probabilistic models are usually not learned for their own sake; rather, they are used to make decisions. Specifically, the authors adopt the point of view of a decision maker who

- (i) operates in an uncertain environment where the consequences of every possible outcome are explicitly monetized,
- (ii) bases his decisions on a probabilistic model, and
- (iii) builds and assesses his models accordingly.

These assumptions are naturally expressed in the language of utility theory, which is well known from finance and decision theory. By taking this point of view, the book sheds light on and generalizes some popular statistical learning approaches, connecting ideas from information theory, statistics, and finance. It strikes a balance between rigor and intuition, conveying the main ideas to as wide an audience as possible.

From reader reviews:

Ramona Wegener:

The reserve untitled Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition) is the reserve that recommended to you to see. You can see the quality of the e-book content that will be shown to you actually. The language that article author use to explained their way of doing something is easily to understand. The article writer was did a lot of study when write the book, so the information that they share for your requirements is absolutely accurate. You also could possibly get the e-book of Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition) from the publisher to make you more enjoy free time.

Mary Young:

Do you have something that you want such as book? The book lovers usually prefer to decide on book like comic, limited story and the biggest an example may be novel. Now, why not trying Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition) that give your enjoyment preference will be satisfied by reading this book. Reading habit all over the world can be said as the opportunity for people to know world considerably better then how they react towards the world. It can't be mentioned constantly that reading behavior only for the geeky person but for all of you who wants to always be success person. So , for every you who want to start looking at as your good habit, you could pick Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition) become your personal starter.

Geraldine Louis:

Are you kind of stressful person, only have 10 or even 15 minute in your day to upgrading your mind skill or thinking skill perhaps analytical thinking? Then you are having problem with the book as compared to can satisfy your small amount of time to read it because pretty much everything time you only find book that need more time to be study. Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition) can be your answer because it can be read by you actually who have those short time problems.

Robert Fox:

A lot of reserve has printed but it is unique. You can get it by world wide web on social media. You can choose the most beneficial book for you, science, comedy, novel, or whatever by searching from it. It is referred to as of book Utility-Based Learning from Data (Chapman & Hall/CRC Machine Learning & Pattern Recognition). You can add your knowledge by it. Without leaving behind the printed book, it can add your knowledge and make a person happier to read. It is most essential that, you must aware about publication. It can bring you from one location to other place.
