El manantial de la vida: Genes y bioética (Ensayo nº 469) (Spanish Edition) Nicolás Jouve de la Barreda
¿Qué concepto tenemos del ser humano como ente biológico? ¿Cómo pudo la evolución generar un ser consciente y ético a partir de unas bestias instintivas y egoístas? ¿Por qué le atribuimos al ser humano el mayor valor y dignidad entre los seres de la naturaleza? ¿Es esta dignidad diferente a lo largo de la vida, desde la concepción hasta la muerte? ¿Qué son realmente los embriones? ¿Cuándo empieza la vida? ¿Es ético producir embriones en el laboratorio y utilizarlos con fines distintos a la reproducción? ¿Existen razones para controlar la fertilidad y la natalidad? ¿A quién beneficia el aborto? ¿Hay algo más progresista que la defensa de la vida humana? ¿Por qué no es ético utilizar los embriones para investigar o producir patentes? Estas son algunas de las preguntas que a lo largo de sus diez capítulos trata de resolver este libro y cuyas respuestas se presentan de forma sencilla, documentada, divulgativa y asequible, basadas en la objetividad y rigor propios de la ciencia y desde una perspectiva bioética personalista y de defensa de la vida humana en todas sus etapas, con el convencimiento de que el bien máspreciado que tenemos y el derecho por encima de todos los derechos es el derecho a la vida.
