This edition incorporates for the first time areas such as data protection, privacy and electronic surveillance, cyber crime and cyber security, jurisdiction and dispute resolution online. The section on IP contains clear and comprehensive analysis of the many and varied ways in which IP and the internet intersect including open source licenses and the IP problems around search engines. The new edition also takes account of all current cases and legislation, including the draft revised EC Telecoms Package and the Audio Visual Media Services Directive.

This book will be essential reading for students, teachers and practitioners interested in Internet law and practice as well as technologists and social scientists.
