The Theory of the Quantum World

David Gross

The Theory of the Quantum World David Gross

Ever since 1911, the Solvay Conferences have shaped modern physics. The 25th edition held in October 2011 in Brussels and chaired by David Gross continued this tradition and celebrated the first centennial of this illustrious series of conferences. The development and applications of quantum mechanics have always been the main threads in the history of the Solvay Conferences, hence the 25th Solvay conference gathered many of the leading figures working on a wide variety of profound problems in physics where quantum mechanical effects play a central role. The conference addressed some of the most pressing open questions in the field of physics.

The proceedings contain the “rapporteur talks” which give a broad overview with unique insights by distinguished and renowned scientists. These lectures cover the seven sessions: “History and Reflections”, “Foundations of Quantum Mechanics and Quantum Computation”, “Control of Quantum Systems”, “Quantum Condensed Matter”, “Particles and Fields”, “Quantum Gravity and String Theory” and it ended with a general discussion attempting to arrive at a synthesis.

In the Solvay tradition, the proceedings also include the prepared comments to the rapporteur talks. The discussions among the participants — some of which quite lively and involving dramatically divergent points of view — have been carefully edited and are reproduced in full.

Contents:

- History and Reflections (*M Henneaux, J Heilbron and M Gell-Mann*)
- Foundations of Quantum Mechanics and Quantum Computation (*A Aspect, A Leggett and J Preskill*)
- Control of Quantum Systems (*P Zoller, I Cirac and S Girvin*)
- Quantum Condensed Matter (*B Halperin and S Sachdev*)
- Particles and Fields (*H Georgi and F Wilczek*)
- Quantum Gravity and String Theory (*J Polchinski, J Maldacena and A Guth*)
- General Discussion and Conclusions (*D Gross, A Aspect, P Zoller, B Halperin, H Georgi and J Polchinski*)

Readership: Graduate students and researchers in physics.

From reader reviews:

Bessie Morris:

Now a day those who Living in the era everywhere everything reachable by talk with the internet and the resources inside can be true or not require people to be aware of each data they get. How individuals to be smart in obtaining any information nowadays? Of course the solution is reading a book. Studying a book can help individuals out of this uncertainty Information specifically this The Theory of the Quantum World book since this book offers you rich details and knowledge. Of course the data in this book hundred percent guarantees there is no doubt in it you may already know.

Leif Gibbs:

People live in this new day of lifestyle always attempt to and must have the free time or they will get lots of stress from both everyday life and work. So , if we ask do people have spare time, we will say absolutely yes. People is human not really a huge robot. Then we request again, what kind of activity have you got when the spare time coming to an individual of course your answer will probably unlimited right. Then do you ever try this one, reading books. It can be your alternative with spending your spare time, the book you have read will be The Theory of the Quantum World.

Bernice Bland:

Reading can called mind hangout, why? Because when you are reading a book mainly book entitled The Theory of the Quantum World your brain will drift away trough every dimension, wandering in every single aspect that maybe unidentified for but surely can become your mind friends. Imaging each and every word written in a reserve then become one contact form conclusion and explanation in which maybe you never get just before. The The Theory of the Quantum World giving you an additional experience more than blown away your brain but also giving you useful info for your better life within this era. So now let us explain to you the relaxing pattern at this point is your body and mind will likely be pleased when you are finished looking at it, like winning an activity. Do you want to try this extraordinary paying spare time activity?

Donna Layne:

Some individuals said that they feel bored stiff when they reading a e-book. They are directly felt the idea when they get a half areas of the book. You can choose typically the book The Theory of the Quantum World to make your current reading is interesting. Your skill of reading proficiency is developing when you just like reading. Try to choose straightforward book to make you enjoy to study it and mingle the feeling about book and examining especially. It is to be very first opinion for you to like to available a book and study it. Beside that the reserve The Theory of the Quantum World can to be a newly purchased friend when you're feel alone and confuse with what must you're doing of their time.
