Genocide, Risk and Resilience: An Interdisciplinary Approach (Rethinking Political Violence)

Genocide, Risk and Resilience: An Interdisciplinary Approach (Rethinking Political Violence)

This collection adopts an interdisciplinary approach in order to understand the various factors at work in genocidal processes and their aftermath. The strong emphasis on legal norms, legal concepts and legal measures in other studies fails to consider further significant issues in relation to genocide. This book aims to redress this balance exploring social dynamics and human behaviour as well as the interplay of various psychological, political, sociological, anthropological and historical factors at work in genocidal processes.

With contributions from top international scholars, this volume provides an integrated perspective on risk and resilience, acknowledging the importance of mitigating factors in understanding and preventing genocide. It explores a range of issues including the conceptual definition of genocide, the notion of intent, preventive measures, transitional justice, the importance of property, the role of memory, self or national interest and principles of social existence.

Genocide, Risk and Resilience aims to cross conceptual, disciplinary and temporal boundaries and in doing so, provides rich insights for scholars from across political science, history, law, philosophy, anthropology and theology.
