Neurology for Nurses J Bickerton, J. Victor Small

Neurology for Nurses is an attempt to make neurology as clear as possible, using the nursing model.

The first portion of this book provides a diagram of the planes of the body that considers the nervous system anatomically, which is referenced throughout the book. The different orientations and planes of the body include the anterior (ventral) surface, posterior (dorsal) surface, lateral, medial, sagittal (median) section, Coronal (frontal) section, and transverse. Other than detailed descriptions of the anatomy and functions of nerves and the nervous system, this book provides diagnostic evaluation of diseases and clinical conditions, such as multiple sclerosis, cerebrovascular accidents, brain tumors, head injury, epilepsy, Parkinson's disease, and meningitis. This book includes as well discussions on neurological examinations, investigations, and observations. The topic on nursing care for unconscious patients is also provided.

This text is aimed primarily at nursing students in training, but will also benefits those taking a post-basic nursing course in neurology.
