Supermodularity and Complementarity (Frontiers of Economic Research) Donald M. Topkis

The economics literature is replete with examples of monotone comparative statics; that is, scenarios where optimal decisions or equilibria in a parameterized collection of models vary monotonically with the parameter. Most of these examples are manifestations of complementarity, with a common explicit or implicit theoretical basis in properties of a super-modular function on a lattice. Supermodular functions yield a characterization for complementarity and extend the notion of complementarity to a general setting that is a natural mathematical context for studying complementarity and monotone comparative statics. Concepts and results related to supermodularity and monotone comparative statics constitute a new and important formal step in the long line of economics literature on complementarity.

This monograph links complementarity to powerful concepts and results involving supermodular functions on lattices and focuses on analyses and issues related to monotone comparative statics. Don Topkis, who is known for his seminal contributions to this area, here presents a self-contained and up-to-date view of this field, including many new results, to scholars interested in economic theory and its applications as well as to those in related disciplines. The emphasis is on methodology. The book systematically develops a comprehensive, integrated theory pertaining to supermodularity, complementarity, and monotone comparative statics. It then applies that theory in the analysis of many diverse economic models formulated as decision problems, noncooperative games, and cooperative games.

From reader reviews:

Jill Davis:

In this 21st hundred years, people become competitive in every single way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of the particular crowded place and notice by surrounding. One thing that oftentimes many people have underestimated this for a while is reading. Yeah, by reading a reserve your ability to survive raise then having chance to stay than other is high. In your case who want to start reading the book, we give you that Supermodularity and Complementarity (Frontiers of Economic Research) book as beginning and daily reading guide. Why, because this book is more than just a book.

John Carter:

This Supermodularity and Complementarity (Frontiers of Economic Research) is great e-book for you because the content that is full of information for you who always deal with world and still have to make decision every minute. This specific book reveal it data accurately using great manage word or we can state no rambling sentences in it. So if you are read that hurriedly you can have whole facts in it. Doesn't mean it only gives you straight forward sentences but tricky core information with attractive delivering sentences. Having Supermodularity and Complementarity (Frontiers of Economic Research) in your hand like obtaining the world in your arm, details in it is not ridiculous just one. We can say that no publication that offer you world with ten or fifteen minute right but this reserve already do that. So , this is good reading book. Hey there Mr. and Mrs. busy do you still doubt which?

Shirley Gilliam:

Is it anyone who having spare time then spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something totally new? This Supermodularity and Complementarity (Frontiers of Economic Research) can be the solution, oh how comes? A book you know. You are and so out of date, spending your time by reading in this new era is common not a nerd activity. So what these ebooks have than the others?

Bettie Hentges:

As we know that book is essential thing to add our know-how for everything. By a guide we can know everything we really wish for. A book is a set of written, printed, illustrated or even blank sheet. Every year ended up being exactly added. This guide Supermodularity and Complementarity (Frontiers of Economic Research) was filled in relation to science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has distinct feel when they reading a new book. If you know how big benefit of a book, you can feel enjoy to read a e-book. In the modern era like currently, many ways to get book you wanted.
