Nanosilicon

Vijay Kumar

Nanosilicon Vijay Kumar

Properties of nanosilicon in the form of nanoparticles, nanowires, nanotubes, and as porous material are of great interest. They can be used in finding suitable components for future miniature devices, and for the more exciting possibilities of novel optoelectronic applications due to bright luminescence from porous silicon, nanoparticles and nanowires. New findings from research into metal encapsulated clusters, silicon fullerenes and nanotubes have opened up a new paradigm in nanosilicon research and this could lead to large scale production of nanoparticles with control on size and shape as well as novel quasi one-dimensional structures. There are possibilities of using silicon as an optical material and in the development of a silicon laser.

In this book leading experts cover state-of-the-art experimental and theoretical advances in the different forms of nanosilicon. Furthermore, applications of nanosilicon to single electron transistors, as photonic material, chemical and biological sensors at molecular scale, and silicon nanowire devices are also discussed. Self-assemblies of silicon nanoforms are important for applications. These developments are also related to cage structures of silicon in clathrates. With an interesting focus on the bottlenecks in the advancement of silicon based technology, this book provides a much-needed overview of the current state of understanding of nanosilicon research.

- * Latest developments in nanoparticles, nanowires and nanotubes of silicon
- * Focus on nanosilicon - a very timely subject attracting large interest
- * Novel chapters on metal encapsulated silicon clusters and nanotubes

From reader reviews:

Eric Hough:

Why don't make it to become your habit? Right now, try to ready your time to do the important behave, like looking for your favorite guide and reading a guide. Beside you can solve your condition; you can add your knowledge by the reserve entitled Nanosilicon. Try to make book Nanosilicon as your good friend. It means that it can to be your friend when you truly feel alone and beside regarding course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you much more confidence because you can know everything by the book. So , let me make new experience and knowledge with this book.

Donna Miller:

The book Nanosilicon give you a sense of feeling enjoy for your spare time. You can use to make your capable much more increase. Book can to get your best friend when you getting tension or having big problem together with your subject. If you can make examining a book Nanosilicon for being your habit, you can get considerably more advantages, like add your own personal capable, increase your knowledge about a number of or all subjects. You can know everything if you like open and read a reserve Nanosilicon. Kinds of book are a lot of. It means that, science publication or encyclopedia or other folks. So , how do you think about this reserve?

Belinda Tenney:

Beside this particular Nanosilicon in your phone, it may give you a way to get nearer to the new knowledge or information. The information and the knowledge you might got here is fresh from the oven so don't end up being worry if you feel like an previous people live in narrow small town. It is good thing to have Nanosilicon because this book offers for you readable information. Do you often have book but you don't get what it's facts concerning. Oh come on, that would not happen if you have this within your hand. The Enjoyable option here cannot be questionable, such as treasuring beautiful island. Techniques you still want to miss it? Find this book as well as read it from now!

Christina Webb:

That book can make you to feel relax. This kind of book Nanosilicon was vibrant and of course has pictures around. As we know that book Nanosilicon has many kinds or style. Start from kids until young adults. For example Naruto or Investigator Conan you can read and think you are the character on there. Therefore not at all of book usually are make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading which.
