Interconnection and the Internet: Selected Papers From the 1996 Telecommunications Policy Research Conference (LEA Telecommunications Series)
The Telecommunications Act of 1996 and the Federal Communications Commission's Local Competition Order are just two examples of the continuing monumental and far-reaching changes occurring throughout the telecommunications industry. At the 1996 Telecommunications Policy Research Conference (TPRC) -- an annual forum for dialogue among scholars and the policymaking community on a wide range of telecommunications issues -- leading industry and academic researchers presented results of their research and insights in key areas of activity, including:
*interconnection and competition;
*Internet growth and commerce;
*Internet regulation and control; and
*the political economy of telecommunications regulation.

The best of the 1996 TPRC papers are included here, representing the forefront of research in the telecommunications industry. The third in an annual LEA series of volumes based on this important conference, this collection reflects the rapid economic, technological, and social development of telecommunications. It also reflects the current state of research thinking on this issue and provides a foundation for further telecommunications policy analysis.
