Novel Techniques in Sensory Characterization and Consumer Profiling

Novel Techniques in Sensory Characterization and Consumer Profiling

Sensory characterization is one of the most powerful, sophisticated, and extensively applied tools in sensory science. Descriptive analysis with trained assessors has been traditionally used for sensory characterization. Due to the cost of time and money required for its application, several novel methodologies, which do not require training, have been recently developed and are gaining popularity as quick and reliable options for gathering sensory information. These methodologies enable the study of consumers' perceptions of the sensory characteristics of products. However, information on these techniques is scattered in scientific journal articles, which hinders their application and creates a need for a book to assemble the details of the latest advances.

Novel Techniques in Sensory Characterization and Consumer Profiling provides a comprehensive overview of classical and novel methods for sensory characterization of food and nonfood products. The book presents the history behind descriptive analysis, describes the most common novel methodologies and detailed information for their implementation, and discusses examples of applications and case studies. It also includes an introduction to exploratory multivariate analysis, addressing the theory and application of some of the most useful multivariate statistical tools applied in the analysis of consumer profiling data sets. Most of the data analysis is implemented in the statistical free software R, making the book accessible to readers unfamiliar with complex statistical software.

Chapters examine a range of techniques including the ideal profile method, just-about-right scales in consumer research, free choice profiling, flash profiling, and repertory grid methods. They cover emerging profiling methods, such as sorting, and projective mapping or Napping[®]. Other techniques less frequently used for sensory profiling are also considered: the application of open-ended questions for sensory characterization, polarized sensory positioning, and the consumer-friendly check-all-that-apply questions. In addition, dynamic sensory characterization methods, useful for studying temporal aspects of in-mouth sensory perception, are described. The final chapter provides a critical comparison of the methodologies discussed, their advantages and disadvantages, and general recommendations for their application.

From reader reviews:

Teresa Raap:

What do you concentrate on book? It is just for students as they are still students or this for all people in the world, the particular best subject for that? Just simply you can be answered for that question above. Every person has different personality and hobby for every other. Don't to be pushed someone or something that they don't wish do that. You must know how great as well as important the book Novel Techniques in Sensory Characterization and Consumer Profiling. All type of book would you see on many solutions. You can look for the internet options or other social media.

Tom Johnson:

Do you one of people who can't read pleasant if the sentence chained inside the straightway, hold on guys this aren't like that. This Novel Techniques in Sensory Characterization and Consumer Profiling book is readable simply by you who hate those straight word style. You will find the information here are arrange for enjoyable examining experience without leaving even decrease the knowledge that want to supply to you. The writer connected with Novel Techniques in Sensory Characterization and Consumer Profiling content conveys the idea easily to understand by lots of people. The printed and e-book are not different in the content material but it just different as it. So , do you continue to thinking Novel Techniques in Sensory Characterization and Consumer Profiling is not loveable to be your top list reading book?

James Furlow:

Nowadays reading books become more than want or need but also turn into a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book that improve your knowledge and information. The info you get based on what kind of guide you read, if you want get more knowledge just go with knowledge books but if you want feel happy read one along with theme for entertaining like comic or novel. The particular Novel Techniques in Sensory Characterization and Consumer Profiling is kind of publication which is giving the reader unforeseen experience.

Susan Granger:

This book untitled Novel Techniques in Sensory Characterization and Consumer Profiling to be one of several books which best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit into it. You will easily to buy this book in the book retail store or you can order it via online. The publisher on this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Smart phone. So there is no reason for your requirements to past this book from your list.
