Not only does it ensure that “classic” pieces are not forgotten by new generations of students and scholars, it also spurs further lesbian research, writing, theory, and scholarship. In Classics in Lesbian Studies, you are introduced to descriptive, theoretical, empirical, applied, and multicultural perspectives in the field of lesbian studies. Interdisciplinary, the book presents pieces from various academic areas in multiple formats, including personal accounts, poetry, editorials, debates, and commentaries. For your convenience, the chapters are organized primarily across four categories: identity, history and literature, physical and social sciences, and “back to lesbian politics.” You will find the discussions of the following issues and subjects provocative and insightful:

- ways black women in the diaspora construct and name their sexual and romantic feelings for other women
 - lesbian identity formation in a changing social environment
 - how lesbians maneuver in the dominant culture and their own subculture
 - lesbianism as a political movement
 - the experiences of lesbian adolescents
 - teaching lesbian studies
 - lesbians and societal institutions, including the work place, the media, the political arena, the legal system, and religion
 - using lesbian-feminist scholarship to reexamine women's lives in the past
- Students, scholars, lesbian feminists, and others interested in lesbian studies will find Classics in Lesbian Studies a vital examination of lesbianism since its grass roots. Not only does it consider the progress made since the initial days of fighting for liberation, it also explores a more distant, repressed past and anticipates future possibilities lying before us. This powerful, insightful collection is sure to become a classic as it grapples with virtually all aspects of lesbianism, from its inception as a political movement to its identity as a lifestyle choice to its implications of community.
