Mohamed Abdallah El-Reedy Ph.D, Mohamed El-Reedy

Advanced Materials and Techniques for Reinforced Concrete Structures Mohamed Abdallah El-Reedy Ph.D, Mohamed El-Reedy

From China to Kuala Lumpur to Dubai to downtown New York, amazing buildings and unusual structures create attention with the uniqueness of their design. While attractive to developers and investors, the safe and economic design and construction of reinforced concrete buildings can sometimes be problematic.

Advanced Materials and Techniques for Reinforced Concrete Structures discusses how to create safety and economy in design, construction, and maintenance operations plans. The author presents up-to-date data on advanced materials and techniques, exploring the advantages and disadvantages of different structure systems in durability, reliability, construction, and architectural requirements.

Highlighting the competitive nature of the business, the author delineates the statistical parameters that govern quality control in concrete construction projects, defining complicated statistical terms and the theoretical background needed for determining and meeting quality control criteria. He begins with a discussion of how to control the project to meet the owner's requirements and includes coverage of the international codes for different loads that affect buildings. The book details traditional and emerging materials used in concrete technology such as high-strength, high-performance, and self-compacted concrete as well as those used in all construction stages for various climates. It concludes with a description of a risk-based maintenance plan for reinforced concrete structures.

A guidebook and handbook, this resource provides the information required for decision-making on structure systems, materials, construction methods, and maintenance plans. Filled with case studies, it delineates practical applications and up-to-date methods for designing and constructing buildings that are aesthetically pleasing and structurally sound.

From reader reviews:

Eleanor Bender:

Now a day those who Living in the era where everything reachable by match the internet and the resources within it can be true or not need people to be aware of each facts they get. How individuals to be smart in acquiring any information nowadays? Of course the correct answer is reading a book. Looking at a book can help persons out of this uncertainty Information especially this Advanced Materials and Techniques for Reinforced Concrete Structures book since this book offers you rich facts and knowledge. Of course the data in this book hundred per cent guarantees there is no doubt in it you know.

Steve Teegarden:

Nowadays reading books be than want or need but also get a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book this improve your knowledge and information. The data you get based on what kind of publication you read, if you want have more knowledge just go with schooling books but if you want truly feel happy read one with theme for entertaining for example comic or novel. The actual Advanced Materials and Techniques for Reinforced Concrete Structures is kind of reserve which is giving the reader erratic experience.

Joyce Murphy:

Advanced Materials and Techniques for Reinforced Concrete Structures can be one of your basic books that are good idea. We recommend that straight away because this guide has good vocabulary that may increase your knowledge in vocab, easy to understand, bit entertaining however delivering the information. The copy writer giving his/her effort to get every word into enjoyment arrangement in writing Advanced Materials and Techniques for Reinforced Concrete Structures however doesn't forget the main level, giving the reader the hottest as well as based confirm resource details that maybe you can be one of it. This great information could drawn you into brand-new stage of crucial pondering.

Nancy Sherman:

Does one one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Aim to pick one book that you find out the inside because don't evaluate book by its cover may doesn't work here is difficult job because you are scared that the inside maybe not because fantastic as in the outside seem likes. Maybe you answer could be Advanced Materials and Techniques for Reinforced Concrete Structures why because the amazing cover that make you consider concerning the content will not disappoint an individual. The inside or content is fantastic as the outside as well as cover. Your reading sixth sense will directly assist you to pick up this book.
