Mobile Telecommunications Factbook (McGraw-Hill Telecommunications) Nathan Muller

For anyone entering or continuing to work in the ever-evolving field of mobile telecommunications, this book is a clear, concise, and easily accessible reference to just about anything you need to know—or soon will! It profiles all the current and emerging technologies, decodes all the buzzwords, and highlights such critical issues as interoperability, interconnectivity, integration, regulation, security and implementation issues, and more. Topics include: Voice Communications, Mobile Messaging, Mobile Computing, Remote Monitoring, Wireless LANs, Wireless Local Loop Systems, Web-Based Management, Cellular Digital Packet Data, Satellite Communications, and Teleworking. The author not only provides crystal-clear "executive summaries" of each topic, but also includes current information on standards, technology innovations, implementation strategies, and management.
