STEM at Yale: Up Down Up: History of Science and Engineering at Yale University William Davison Glover

STEM at Yale: Up Down Up This book is a history that tracks Yale's progress in science, technology, engineering and mathematics (STEM) over two centuries. This period includes three major wars, numerous recessions, and one Great Depression. Yale University is now fully capable of meeting the enormous challenge of preparing highly intelligent students to forward mankind's quest for a better world. In my extensive research to write this book, I perused the writings and biographies of many great people. We begin with President Timothy Dwight IV and Benjamin Silliman, two Yale legends who brought science and engineering to Yale. Dwight's goal was the formation of the Yale Medical School, and Silliman was the creative force that made this happen. Silliman, in his continuing enquiry into new sciences, was also responsible for the Yale Scientific School, the first geology department in the country, and the building of the Peabody Museum. Joseph Sheffield emerges in the midst of the 19th century as the philanthropic supporter of a separate Sheffield Scientific School that grew rapidly to become the leading school of its kind in the United States. The turn of the century in 1900, combined with Yale's 200th anniversary in 1901, brought many alumni organizations into being, including the Yale Engineering Association, founded in 1914 on the eve of WWI. The Yale Aero Club and Marc Wortman's compelling book, "The Millionaires' Unit" introduced me to Trubee Davison and John Hammond, a Yale Sheffield Scientific School graduate and aviation pioneer, formed the first U.S. Navy air patrol unit during World War I. These Yale men are the acknowledged founders of the U.S. Naval Air Force, born in WWI and essential in WWII. My history ends positively. The remarkable efforts of President Richard Levin's emphasis in Science, Technology, Engineering, and Mathematics (STEM) at Yale has increased Yale's impact globally and, in the biomedical cluster businesses in the New Haven, CT region. Levin and his colleagues have brought Yale into the company of elite world universities. His response to a national call to educate our youth for the Computer Age finds Yale once again in a leadership position. Ivy league schools have slowly accepted and are now introducing reinvigorated STEM programs. In 2007, Harvard announced its first new school in seven decades: the School of Engineering and Applied Sciences. Columbia University's program, through its Fu Foundation School of Engineering and Applied Science, is the largest in the Ivy league. MIT is highly rated, but recognizes the need to build up its liberal arts programs. Our country's future as a global economic powerhouse is challenged as other nations realize that economic growth brings a better life for their people. To retain economic leadership in high technology, our best universities need new goals and major changes. In elementary and secondary school education, many countries are superior to the U.S. At the college and university level, our schools are judged superior to those of other countries. For the U.S. to retain its economic leadership, we need improved STEM education policies at all levels -- particularly in our public school system. "Rising Above the Gathering Storm," a government study that dealt with this problem, is being implemented by follow-up projects and renewed concerns within the country's top universities The best world universities must offer students a blend of humanities and the sciences to serve a fast-developing, complex world driven by new inventions. Leaders, schooled at Yale, will be among those who use these new tools to create a unified, peaceful, and better world. William Davison Glover February 2015

From reader reviews:

Deanna Ratliff:

As people who live in often the modest era should be change about what going on or data even knowledge to make these individuals keep up with the era and that is always change and advance. Some of you maybe will probably update themselves by reading books. It is a good choice for you but the problems coming to a person is you don't know what kind you should start with. This STEM at Yale: Up Down Up: History of Science and Engineering at Yale University is our recommendation so you keep up with the world. Why, because this book serves what you want and want in this era.

Mary West:

Spent a free time for you to be fun activity to perform! A lot of people spent their down time with their family, or their very own friends. Usually they accomplishing activity like watching television, gonna beach, or picnic inside the park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? Could be reading a book may be option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to try look for book, may be the reserve untitled STEM at Yale: Up Down Up: History of Science and Engineering at Yale University can be excellent book to read. May be it can be best activity to you.

Fred Swett:

Why? Because this STEM at Yale: Up Down Up: History of Science and Engineering at Yale University is an unordinary book that the inside of the publication waiting for you to snap it but latter it will zap you with the secret this inside. Reading this book close to it was fantastic author who write the book in such amazing way makes the content inside of easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this anymore or you going to regret it. This unique book will give you a lot of positive aspects than the other book get such as help improving your skill and your critical thinking way. So , still want to postpone having that book? If I had been you I will go to the e-book store hurriedly.

George Privette:

That publication can make you to feel relax. This particular book STEM at Yale: Up Down Up: History of Science and Engineering at Yale University was colorful and of course has pictures on the website. As we know that book STEM at Yale: Up Down Up: History of Science and Engineering at Yale University has many kinds or type. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and think that you are the character on there. So , not at all of book are make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for you and try to like reading which.
