Andrew C. Harvey

Forecasting, Structural Time Series Models and the Kalman Filter Andrew C. Harvey

In this book, Andrew Harvey sets out to provide a unified and comprehensive theory of structural time series models. Unlike the traditional ARIMA models, structural time series models consist explicitly of unobserved components, such as trends and seasonals, which have a direct interpretation. As a result the model selection methodology associated with structural models is much closer to econometric methodology. The link with econometrics is made even closer by the natural way in which the models can be extended to include explanatory variables and to cope with multivariate time series. From the technical point of view, state space models and the Kalman filter play a key role in the statistical treatment of structural time series models. The book includes a detailed treatment of the Kalman filter. This technique was originally developed in control engineering, but is becoming increasingly important in fields such as economics and operations research. This book is concerned primarily with modelling economic and social time series, and with addressing the special problems which the treatment of such series poses. The properties of the models and the methodological techniques used to select them are illustrated with various applications. These range from the modellling of trends and cycles in US macroeconomic time series to to an evaluation of the effects of seat belt legislation in the UK.

From reader reviews:

Marie Aultman:

Hey guys, do you desires to finds a new book to see? May be the book with the concept Forecasting, Structural Time Series Models and the Kalman Filter suitable to you? Typically the book was written by well known writer in this era. Often the book untitled Forecasting, Structural Time Series Models and the Kalman Filteris a single of several books which everyone read now. That book was inspired many men and women in the world. When you read this publication you will enter the new dimensions that you ever know prior to. The author explained their strategy in the simple way, so all of people can easily to know the core of this publication. This book will give you a large amount of information about this world now. In order to see the represented of the world in this particular book.

Marian Jackson:

The reserve untitled Forecasting, Structural Time Series Models and the Kalman Filter is the reserve that recommended to you to learn. You can see the quality of the e-book content that will be shown to you. The language that publisher use to explained their ideas are easily to understand. The copy writer was did a lot of analysis when write the book, so the information that they share to you personally is absolutely accurate. You also can get the e-book of Forecasting, Structural Time Series Models and the Kalman Filter from the publisher to make you far more enjoy free time.

Lucille Grant:

Can you one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Attempt to pick one book that you never know the inside because don't assess book by its cover may doesn't work the following is difficult job because you are afraid that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer could be Forecasting, Structural Time Series Models and the Kalman Filter why because the great cover that make you consider regarding the content will not disappoint you actually. The inside or content will be fantastic as the outside as well as cover. Your reading 6th sense will directly guide you to pick up this book.

Brandi Johnson:

E-book is one of source of understanding. We can add our know-how from it. Not only for students but additionally native or citizen have to have book to know the upgrade information of year to be able to year. As we know those ebooks have many advantages. Beside most of us add our knowledge, can also bring us to around the world. By book Forecasting, Structural Time Series Models and the Kalman Filter we can acquire more advantage. Don't that you be creative people? To be creative person must like to read a book. Only choose the best book that suited with your aim. Don't be doubt to change your life with this book Forecasting, Structural Time Series Models and the Kalman Filter. You can more inviting than now.
