Diggs, William Eichbaum, Steven Walters, Wesley Wettengel, Tom Allnutt, Colby J. Loucks, Prashant Hedao, Caroline (Lynne) Taylor

North America's freshwater habitats and the extraordinary biodiversity they contain are facing unprecedented threats from a range of sources, including flow alteration, habitat fragmentation, introduced species, and overall land use changes. With nearly every freshwater system suffering from some degree of degradation and conservation resources limited, there is an urgent and practical need to set priorities. As an initial step in identifying those areas where protective and restorative measures should be implemented first, World Wildlife Fund-US assembled a team of leading scientists to conduct a conservation assessment of freshwater ecoregions. "Freshwater Ecoregions of North America" presents that assessment and outlines measures that must be taken to conserve, and in many cases restore, native biodiversity. The book: identifies freshwater ecoregions that support globally outstanding biological diversity assesses the types and immediacy of threats to North American ecoregions identifies gaps in information that hamper an accurate evaluation of biodiversity provides a broad-scale framework for conservation activities In addition, it offers appendixes that provide detailed descriptions of methodologies, raw scores and statistical analysis of results, and an integrated biological distinctiveness and conservation status index. Also included are 21 full-color maps. "Freshwater Ecoregions of North America" is an authoritative reference on a subject of vital importance, and will be an essential tool for scientists, conservation professionals, students, and anyone interested in the conservation of North America's freshwater systems.

**From reader reviews:**

**Percy Brown:**

Book is to be different for each grade. Book for children till adult are different content. To be sure that book is very important for people. The book Freshwater Ecoregions of North America: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) had been making you to know about other know-how and of course you can take more information. It is very advantages for you. The e-book Freshwater Ecoregions of North America: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) is not only giving you a lot more new information but also being your friend when you really feel bored. You can spend your personal spend time to read your reserve. Try to make relationship together with the book Freshwater Ecoregions of North America: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments). You never sense lose out for everything in the event you read some books.

**Amanda Bell:**

Here thing why this specific Freshwater Ecoregions of North America: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) are different and dependable to be yours. First of all studying a book is good nonetheless it depends in the content than it which is the content is as tasty as food or not. Freshwater Ecoregions of North America: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) giving you information deeper as different ways, you can find any guide out there but there is no book that similar with Freshwater Ecoregions of North America: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments). It gives you thrill reading journey, its open up your own personal eyes about the thing in which happened in the world which is perhaps can be happened around you. You can easily bring everywhere like in playground, café, or even in your way home by train. In case you are having difficulties in bringing the published book maybe the form of Freshwater Ecoregions of North America: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) in e-book can be your alternate.

**Alan Robert:**

Reading a book to become new life style in this 12 months; every people loves to study a book. When you read a book you can get a large amount of benefit. When you read books, you can improve your knowledge, because book has a lot of information in it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your research, you can read education books, but if you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, along with soon. The Freshwater Ecoregions of North America: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) will give you new experience in examining a book.

**Bernice Capps:**

Many people spending their period by playing outside using friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to pay your whole day by looking at a book. Ugh, you think reading a book really can hard because you have to bring the book everywhere? It fine you can have the e-book, delivering everywhere you want in your Cell phone. Like Freshwater Ecoregions of North America: A Conservation Assessment (World Wildlife Fund Ecoregion Assessments) which is keeping the e-book version. So , try out this book? Let's view.
