Philosophy of Economy (Russian Literature and Thought Series) Professor Sergei Bulgakov

The writings of Sergei Bulgakov (1871-1944), like those of other major social thinkers of Russia's Silver Age, were obliterated from public consciousness under Soviet rule. Discovered again after eighty years of silence, Bulgakov's work speaks with remarkable directness to the postmodern listener. This outstanding translation of *Philosophy of Economy* brings to English-language speakers for the first time a major work of social theory written by a critical figure in the Russian tradition of liberal thought. What is unique about Bulgakov, Catherine Evtuhov explains in her introduction to this book, is that he bridges two worlds. His social thought is firmly based in the Western tradition, yet some of his ideas reflect a specifically Russian way of thinking about society. Though arguing strenuously in favour of political and social liberty, Bulgakov repudiates the individualistic basis of Western liberalism in favour of a conception of human dignity that is compatible with collectivity. His economic theory stresses the spiritual content of life in the world and imagines national life as a kind of giant household.

Bulgakov's work, with its singularly postmodern balance between Western and non-Western, offers fascinating implications for those in the process of reevaluating ideologies in post-Soviet Russia and in America as well.
