## Coding Theory and Cryptography: From Enigma and Geheimschreiber to Quantum Theory

The National Security Agency funded a conference on Coding theory, Cryptography, and Number Theory (nick-named Cryptoday) at the United States Naval Academy, on October 25-27, 1998. We were very fortunate to have been able to attract talented mathematicians and cryptographers to the meeting.

Unfortunately, some people couldn't make it for either scheduling or funding reasons. Some of these have been invited to contribute a paper anyway. In addition, Prof. William Tutte and Frode Weierud have been kind enough to allow the inclusion of some very interesting unpublished papers of theirs. The papers basically fall into three categories. Historical papers on cryptography done during World War II (Hatch, Hilton, Tutte, Ulfving, and Weierud), mathematical papers on more recent methods in cryptography (Cosgrave, Lomonoco, Wardlaw), and mathematical papers in coding theory (Gao, Joyner, Michael, Shokranian, Shokrollahi). A brief biography of the authors follows. - Peter Hilton is a Distinguished Professor of Mathematics Emeritus at the State University of New York at Binghamton. He worked from 1941 to 1945 in the British cryptanalytic headquarters at Bletchley Park. Professor Hilton has done extensive research in algebraic topology and group theory. - William Tutte is a Distinguished Professor Emeritus and an Adjunct Professor in the Combinatorics and Optimization Department at the University of Waterloo. He worked from 1941 to 1945 in the British cryptanalytic headquarters at Bletchley Park. Professor Tutte has done extensive research in the field of combinatorics.

### **From reader reviews:**

#### **Steven Clayton:**

Do you have favorite book? If you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each publication has different aim or maybe goal; it means that reserve has different type. Some people really feel enjoy to spend their time and energy to read a book. They may be reading whatever they take because their hobby will be reading a book. Think about the person who don't like examining a book? Sometime, man feel need book whenever they found difficult problem or even exercise. Well, probably you'll have this Coding Theory and Cryptography: From Enigma and Geheimschreiber to Quantum Theory.

#### **John Dudley:**

Have you spare time to get a day? What do you do when you have considerably more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent all their spare time to take a stroll, shopping, or went to typically the Mall. How about open or perhaps read a book titled Coding Theory and Cryptography: From Enigma and Geheimschreiber to Quantum Theory? Maybe it is to get best activity for you. You realize beside you can spend your time with your favorite's book, you can more intelligent than before. Do you agree with its opinion or you have additional opinion?

#### **Celia Redmond:**

The reserve untitled Coding Theory and Cryptography: From Enigma and Geheimschreiber to Quantum Theory is the book that recommended to you you just read. You can see the quality of the e-book content that will be shown to anyone. The language that writer use to explained their ideas are easily to understand. The article writer was did a lot of study when write the book, so the information that they share for you is absolutely accurate. You also could possibly get the e-book of Coding Theory and Cryptography: From Enigma and Geheimschreiber to Quantum Theory from the publisher to make you considerably more enjoy free time.

#### **Hazel Fletcher:**

Spent a free time for you to be fun activity to accomplish! A lot of people spent their spare time with their family, or their own friends. Usually they accomplishing activity like watching television, about to beach, or picnic in the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? Might be reading a book is usually option to fill your free time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to try look for book, may be the guide untitled Coding Theory and Cryptography: From Enigma and Geheimschreiber to Quantum Theory can be good book to read. May be it can be best activity to you.
