**Multidimensional Data Visualization: 809 (Springer Optimization and Its Applications)** Gintautas Dzemyda, Olga Kurasova, Julius Žilinskas

This book highlights recent developments in multidimensional data visualization, presenting both new methods and modifications on classic techniques. Throughout the book, various applications of multidimensional data visualization are presented including its uses in social sciences (economy, education, politics, psychology), environmetrics, and medicine (ophthalmology, sport medicine, pharmacology, sleep medicine). The book provides recent research results in optimization-based visualization. Evolutionary algorithms and a two-level optimization method, based on combinatorial optimization and quadratic programming, are analyzed in detail. The performance of these algorithms and the development of parallel versions are discussed. The utilization of new visualization techniques to improve the capabilities of artificial neural networks (self-organizing maps, feed-forward networks) is also discussed. The book includes over 100 detailed images presenting examples of the many different visualization techniques that the book presents. This book is intended for scientists and researchers in any field of study where complex and multidimensional data must be represented visually.

### **From reader reviews:**

#### **William Herold:**

Hey guys, do you would like to finds a new book to study? May be the book with the title Multidimensional Data Visualization: 809 (Springer Optimization and Its Applications) suitable to you? Often the book was written by popular writer in this era. Often the book untitled Multidimensional Data Visualization: 809 (Springer Optimization and Its Applications) is a single of several books that everyone read now. This kind of book was inspired a lot of people in the world. When you read this publication you will enter the new dimension that you ever know previous to. The author explained their idea in the simple way, and so all of people can easily to know the core of this e-book. This book will give you a wide range of information about this world now. To help you see the represented of the world within this book.

#### **John Glass:**

A lot of people always spent their free time to vacation or perhaps go to the outside with them family members or their friend. Did you know? Many a lot of people spent they will free time just watching TV, as well as playing video games all day long. If you want to try to find a new activity that's look different you can read the book. It is really fun for you. If you enjoy the book you read you can spent all day long to reading a reserve. The book Multidimensional Data Visualization: 809 (Springer Optimization and Its Applications) it is rather good to read. There are a lot of people that recommended this book. They were enjoying reading this book. In case you did not have enough space to create this book you can buy often the e-book. You can m0ore quickly to read this book from your smart phone. The price is not too costly but this book possesses high quality.

#### **Rhonda Yowell:**

Playing with family in a park, coming to see the sea world or hanging out with close friends is thing that usually you may have done when you have spare time, in that case why you don't try thing that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Multidimensional Data Visualization: 809 (Springer Optimization and Its Applications), you could enjoy both. It is great combination right, you still desire to miss it? What kind of hang-out type is it? Oh seriously its mind hangout fellas. What? Still don't understand it, oh come on its identified as reading friends.

#### **Veronica Turner:**

What is your hobby? Have you heard this question when you got students? We believe that that concern was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. And you also know that little person like reading or as studying become their hobby. You need to understand that reading is very important and also book as to be the issue. Book is important thing to include you knowledge, except your teacher or lecturer. You see good news or update in relation to something by book. Amount types of

books that can you decide to try be your object. One of them is Multidimensional Data Visualization: 809 (Springer Optimization and Its Applications).
