Neurological Rehabilitation: Chapter 19. Neurological rehabilitation: sexuality and reproductive health (Handbook of Clinical Neurology) Mindy Lipson Aisen

Sexuality is the embodiment of sexual and reproductive activities involving complex interactions among biological, psychological, and social systems. An individual's perception of their sexuality, as well as society's perception, can have an inestimable impact on self-esteem, and hence willingness to openly address these issues. Disability, facilitated sex and the role of the nurse. *J Adv Nurs* 3: 433–440. Such barriers to communication represent a real challenge to practicing clinicians. However, advances in treatment options obligate the clinician providing care to those with neurogenic sexual/reproductive dysfunction to learn to communicate effectively about these issues, provide effective therapies, and refer patients to appropriate specialists. This chapter will address counseling, an overview of male and female sexual and reproductive physiological responses in the case of an intact nervous system, and a description of the impact of disorders of the nervous system on sexual function and reproductive health. Treatment options are also reviewed.
