Water, Environmental Security and Sustainable Rural Development: Conflict and Cooperation in Central Eurasia

Water, Environmental Security and Sustainable Rural Development: Conflict and Cooperation in Central Eurasia

This co-edited volume provides a unified scholarly treatment of intensifying debates on the relationship between water scarcity and environmental security in Central Eurasia. Using discussions of sustainable rural development as its conceptual backdrop, the chapters in this volume combine solid empirical investigation with critical analysis of key concepts such as 'scarcity', 'expert knowledge', and 'efficiency'. The central theme emerging from the contributions emphasizes the need to reevaluate accepted wisdom in resource studies that considers distributional conflicts over water usage as inherently zero-sum outcomes in which one player's gains inevitably correspond to another player's losses. Instead, the empirical and critical analyses in this book demonstrate that effective management of water resources can be re-conceptualized as the basis for regional cooperation and sustainable rural development.
