Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe

J. Craig Wheeler

Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe J. Craig Wheeler

From supernovae and gamma-ray bursts to the accelerating Universe, this is an exploration of the intellectual threads that lead to some of the most exciting ideas in modern astrophysics and cosmology. This fully updated second edition incorporates new material on binary stars, black holes, gamma-ray bursts, worm-holes, quantum gravity and string theory. It covers the origins of stars and their evolution, the mechanisms responsible for supernovae, and their progeny, neutron stars and black holes. It examines the theoretical ideas behind black holes and their manifestation in observational astronomy and presents neutron stars in all their variety known today. This book also covers the physics of the twentieth century, discussing quantum theory and Einstein's gravity, how these two theories collide, and the prospects for their reconciliation in the twenty-first century. This will be essential reading for undergraduate students in astronomy and astrophysics, and an excellent, accessible introduction for a wider audience.

From reader reviews:

Leonard White:

The book Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe can give more knowledge and information about everything you want. So just why must we leave the good thing like a book Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe? Wide variety you have a different opinion about reserve. But one aim that book can give many information for us. It is absolutely proper. Right now, try to closer along with your book. Knowledge or information that you take for that, you could give for each other; you can share all of these. Book Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe has simple shape but the truth is know: it has great and large function for you. You can search the enormous world by start and read a publication. So it is very wonderful.

Gerri Townsend:

The actual book Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe will bring that you the new experience of reading a new book. The author style to describe the idea is very unique. In the event you try to find new book to learn, this book very suited to you. The book Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe is much recommended to you to study. You can also get the e-book from official web site, so you can more easily to read the book.

Katie Harper:

People live in this new day time of lifestyle always make an effort to and must have the spare time or they will get lots of stress from both daily life and work. So , once we ask do people have free time, we will say absolutely of course. People is human not really a huge robot. Then we consult again, what kind of activity do you possess when the spare time coming to a person of course your answer will probably unlimited right. Then do you try this one, reading textbooks. It can be your alternative with spending your spare time, the particular book you have read will be Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe.

Stephany Garcia:

Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe can be one of your beginning books that are good idea. We recommend that straight away because this reserve has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining however delivering the information. The author giving his/her effort to put every word into delight arrangement in writing Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe however doesn't forget the main point, giving the reader the hottest in addition to based confirm resource information that maybe you can be one of it. This great information can easily drawn you into fresh stage of crucial considering.
