# Bullying, Rejection, & Peer Victimization: A Social Cognitive Neuroscience Perspective

## **Bullying, Rejection, & Peer Victimization: A Social Cognitive Neuroscience Perspective**

Both children and adults who experience chronic peer victimization are at considerable risk for a host of adverse psychological consequences, including depression, aggression, even suicidal ideation. *Bullying, Rejection, and Peer Victimization* is the only book that addresses bullying across the developmental spectrum, covering child, adolescent, and adult populations.

The contributors offer in-depth analyses on traditional aggression and victimization (physical bullying) as well as social rejection (emotional bullying). Peer and family relationships, relational aggression, and cyber-bullying are just a few of the important topics discussed.

### **Key Features:**

- Analyzes both perpetrator's and victim's sides of the peer victimization experience
- Explores how gender traits influence aggression
- Investigates how family dynamics influence chronic peer victimization
- Examines the relationships between social status, power, and aggression

This text offers a wealth of insight into the experiences of victims of peer bullying, using cutting-edge theoretical perspectives, including social cognition, social ecology, genetics and genetic-environment interactions, and social cognitive neuroscience.
